

When You're On The Fireline... So Are We.

# FireLine™

From PGI, Inc.

PGI's new Fireline is the ultimate wildland fire fighting clothing. Garments are designed to allow maximum ease of movement with minimum bulk. Developed in collaboration with professional fire fighters, Fireline garments are engineered with phenomenal attention to detail.

This focus has led to unique features such as seamless shoulders, ergonomic sculptured fit and articulated elbows and knees. From it's earliest designs PGI's Fireline has enabled thousands of Wildland fire fighters to perform their tasks with better comfort and mobility while minimizing heat stress. But only recently have we developed clothing that comes close to achieving our initial goal of minimum weight and bulk, and utmost versatility and ease of movement.
